# LEODYVER S. SEMILLA

Gloria, Oriental Mindoro | +63 977 761 6365 | leodyversemilla07@gmail.com | linkedin.com/in/leodyversemilla07 | github.com/leodyversemilla07

## EDUCATION

**MINDORO STATE UNIVERSITY – BONGABONG CAMPUS** Bongabong
BS Information Technology 2026

General Weighted Average (GWA): 1.46 (Academic Distinction); Dean's Lister, 2022–2025
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Web Systems & Technologies, Networking, Information Assurance & Security

## WORK EXPERIENCE

**HYTEC POWER INC.** Novaliches, Quezon City
Backend Developer Intern Feb 2026 – Apr 2026

- Built and maintained core modules of an internal HRIS in Laravel, streamlining employee records, and HR workflows across the organization
- Implemented API rate limiting across key endpoints to prevent abuse and ensure fair resource allocation, improving system stability during peak usage
- Designed and shipped a maintenance-mode feature with a custom status page, enabling smoother, zero-surprise deployments and reducing user-facing downtime
- Collaborated with the engineering team on code reviews, bug fixes, and backend documentation, improving code quality and speeding up onboarding for new team members

## PROJECTS

**TELEHEALTH APP (White Cloak Technologies — Launchpad Program)** 2026

- Built a full-stack telehealth platform for online patient–doctor consultations using TypeScript, Next.js, NestJS, and PostgreSQL
- Implemented role-based access for patients, doctors, and admins with real-time video consultations (LiveKit), live chat (Socket.io), and appointment booking with timezone-safe availability
- Deployed to AWS (EC2, RDS, S3) with private document storage, email notifications (Resend), and hardened authentication (account lockout, rate limiting, role whitelisting)

**MINSU BC SYSTEMS PLATFORM (Mindoro State University)** 2025-2026

- Built a unified campus management platform covering registrar, admissions, student affairs, and USG operations using PHP (Laravel), React, Inertia.js, TypeScript, and MySQL
- Architected 19 independent modules (183 controllers, 148 models, 81 migrations) with role- and record-level access control, PayMongo payments, and PDF document generation
- Enforced reliability with 949 automated tests across 96 test files and CI pipelines for linting, unit tests, and end-to-end coverage

## ACTIVITIES

**HACK4GOV – DICT CERT-PH CYBER CHALLENGE** MIMAROPA Region
Regional Wildcard, National Finalist 2024

- Achieved the highest individual score in the MIMAROPA regional qualifier, earning a wildcard slot to the national Capture-the-Flag championship
- Competed at the national level as part of a composite wildcard team with top scorers from other regions across cryptography, web security, network security, and forensics challenges

## ADDITIONAL

**Technical Skills**: Proficient in JavaScript/TypeScript, PHP (Laravel), Python, React, Node.js, MySQL, HTML/CSS; Familiar with Docker, REST APIs, AWS, Git, blockchain (MultiChain), and cybersecurity fundamentals (CTF, network/web security)
**Languages:** English (fluent), Filipino (native)
